Founded in 2014, following a contractors need to comply with industry standard compliance documentation, Bolster Systems was initially created to cover fire stopping related building documentation.

The systems success has led to further versions to now cover compliance of all elements of a building. Bolster Systems mission is to create simple applications that allow trade professionals to be more productive by automating compliance documentation.

Upload floorplan drawings of buildings to our bespoke pin drop system to accurately locate your findings

Custom template creation to tailor the system to your compliance needs

Save time and money with PDF, spreadsheet and location drawing generation at the click of a button

Multi service documentation through one portal

Secure cloud-based data storage accessible from any location

Sign on site required documentation (method statements, RAM's, Safe Starts, Permits) directly through the app

Track project progress in real time

Offer your clients free access to monitor works

## The Bolster System can be utilised for the survey, installation and inspection of :-

### Any other compliance documentation

The Bolster system is fully dynamic and so can be individually tailored to our client's needs. We can therefore offer bespoke templates for additional services not currently mentioned in our other services. Please contact the Bolster Systems team for further information.

01.  **Create Users**

Create an unlimited number of Admins/Operatives through the Bolster desktop

02.  **Create bespoke templates**

Each service subscribed to will come with default templates curated by Bolster Systems. You can outline bespoke templates to Bolster Systems to ensure your documentation requirements are met

03.  **Create sites & upload floorplan drawings**

Upload PDF or JPEG floorplan drawings for sites you are working on to locate any defects or remedial works

04.  **Upload and sign on site required documentation**

Upload PDF or JPEG documents such as Data Sheets, Method Statements, RAM's, permits & Safe Starts to sites to ensure all essential documentation is available to operatives

Operatives will then have the ability to view and

05.  **Drop pins on drawings to document works**

Use the colour coded pin system and bespoke templates to locate and document any survey, remedial or maintenance works being carried out on site

06.  **Up-sync work to the cloud & track real time through the company dashboard**

Send any data documented on site to the Bolster Systems dedicated cloud-based servers to be accessed by company admins through the desktop

Through the desktop admins can keep track of their

07.  **Grant client's free access**

Invite client's free of charge for read-only access to required sites to view progress ensuring

08.  **Generate unlimited PDF, CSV, Floorplan reports & O&M Manuals**

Bolster Systems report generator will drastically reduce your time spent collating data allowing you to generate PDF, Spreadsheet and Floorplan reports in a matter of seconds

Download Data Sheets for all materials used within a project to include in your O&M manuals upon completion of works

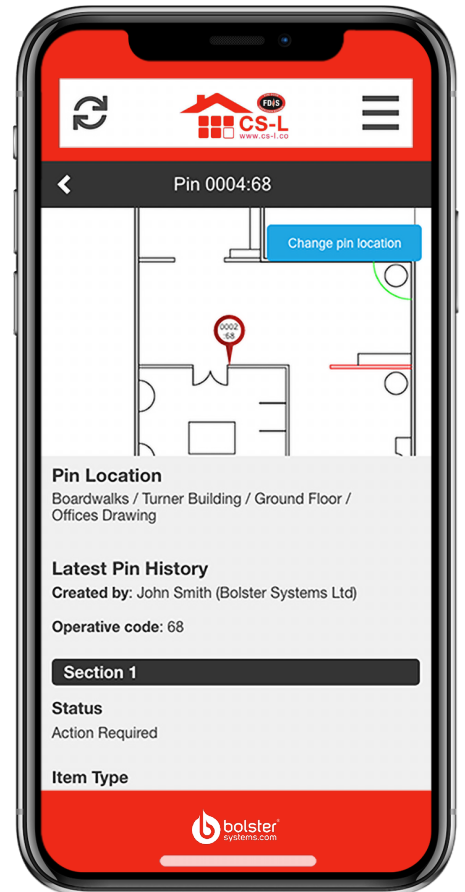

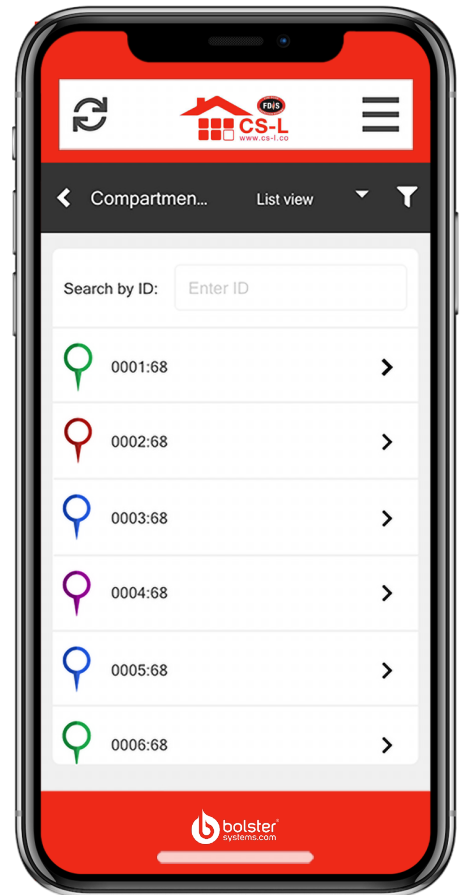

09.  **Transfer/receive works from other Bolster companies free of charge**

Work alongside other Bolster Approved Companies on the same drawings to ensure all stages of work are documented in one place and there is complete

10.  **Manage jobs and set up alerts for scheduled future works**

Manage on-going or completed projects on a daily basis through the desktop admin area

Schedule email and system alerts for future survey or remedial actions required across sites
